

Awards of Excellence 2012

2012 SPASA Awards of Excellence 18a. New Product Sustainability Award

This award is presented to recognize the most innovative and sustainable new product in the 2012 SPASA Awards of Excellence for New Product Sustainability.

Champion E10 Water Management System

The Most Efficient Method to Reduce Swimming Pools

The new Champion E10 Water Management System is the most sustainable and efficient way yet introduced to reduce your pool's footprint of 100,000 litres per year.

The Champion E10 is capable of setting time of pool closure to a pool's needs and can handle a wide range of applications for chlorine, salt, and other pool chemicals. As a result, pool operators can save up to 10% on their pool's operating costs.
